Summary

Machine learning enthusiast experienced in building recommendation systems for e-commerce platforms using collaborative filtering techniques.

Skills

Python, Surprise, Pandas, NumPy, Matplotlib, Collaborative Filtering, Content-Based Filtering

Projects

Product Recommendation System:

- Built a hybrid recommendation system using item-based and user-based collaborative filtering.
- Used MovieLens and Amazon review datasets.
- Deployed the model using Flask for demonstration.

Education

B.Tech in Computer Science, E-Commerce Engineering College, 2021-2025
