CAREER OBJECTIVE

To begin my career in data science and machine learning, utilizing my analytical skills, Python knowledge, and ML understanding to solve real-world problems and contribute to data-driven decision-making in a growth-focused organization.

WORK EXPERIENCE

Data Science With ML • Internship   Jun 2025 - Jul 2025
Upflair, Jaipur

Collected, cleaned, and preprocessed data using Python libraries like Pandas and NumPy. Applied machine learning algorithms (regression, classification, clustering) using Scikit-learn. Visualized data insights using Matplotlib and Seaborn for better understanding and communication. Evaluated model performance with metrics like accuracy, precision, recall, and improved results through tuning.

DSA With C++ • Internship   Jul 2024 - Aug 2024
LEARN AND BUILD, Jaipur

Proficient in Data Structures and Algorithms using C++. Skilled in implementing arrays, linked lists, stacks, queues, trees, graphs, and hash maps with a deep understanding of time and space complexity. Experienced in solving competitive programming problems using recursion, dynamic programming, greedy algorithms, and backtracking. Focused on writing optimized, readable, and efficient code to solve complex computational problems and improve system performance.

EDUCATION

B.Tech, Computer Science & Engineering   2022 - 2026
Anand International College of Engineering, Jaipur

PROJECTS

Email Spam Classifier ↗
Jun 2025 - Jul 2025

It's a project that classify the email that email is spam or not

Used bikes prediction ↗
Jun 2025

It's a project that is based on linear regression and it predict used bikes price

SKILLS

- Python
- NumPy
- Seaborn
- Machine Learning
- Pandas
- Deep Learning
- Data Science
- Matplotlib

EXTRA CURRICULAR ACTIVITIES

- Manage a eSports event at college.
